#### STATE OFFICIAL DIES AT CARSON

PASSING OF JOE JOSEPHS,  
CLERK OF SUPREME COURT  
OF NEVADA

A wire received by Charles Epstein from Carson City this afternoon brought news of the death of Joe Josephs, clerk of the supreme court of Nevada, who had recently succeeded himself in office. Mr. Josephs had been ill for a number of months. For a long time he had been a sufferer from asthma and this superinduced anaemia. Mr. Josephs was aged 74 years and was a resident of Nevada since the early days. He was a resident of the Comstock in the boom days and held several county offices. For a number of years he was superintendent of the State orphan's home. While an incumbent of that position he discovered that the constitution of Nevada provided for an office known as clerk of the supreme court of the state, a position that hitherto had been filled ex-officio by the secretary of state. After certain legal preliminaries he had the office made elective and was a candidate and was elected. At the recent campaign he had two opponents in the primaries on the Democratic ticket and was unopposed by the Republicans.

According to a provision of the constitution of Nevada, the governor shall appoint a successor to Mr. Josephs, but it is further provided by the constitution that the appointee shall hold office only until the next state election, when a successor shall be elected for the unexpired term. This makes Mr. Josephs' successor's tenure of office a little over 23 months, while the latter's successor will be chosen for two years instead of four.

By the same train there went out a car of concentrates weighing 22 tons and net of an approximate value of \$400 a ton, or \$8,800, making the total shipment valued at about \$63,800. Both the bullion and concentrates represented a run of two weeks. Hitherto since the first of January the shipments of bullion, concentrates and slag had been to the value of \$250,420.29, making the total for January thus far \$354,226.29.

#### FORMER NEVADAN BACK TO DESERT

CLAUDE SMITH TELLS ABOUT  
OPERATIONS ON SPEARHEAD  
PROPERTY

Claude M. Smith, one of the pioneers of Goldfield and the first district recorder there, arrived yesterday from his new home in Paradise, Cal., and, after spending a day or two in Tonopah, will continue on to Goldfield, where he retains some of his original interests. One of these holdings is a large block of stock in the Spearhead, of which company he is a director and secretary. There are two leases on this ground, one of which is the Goldfield Shale, a concern which is quoted on exchange. The other is the Codd lease. Mr. Codd has a carload of machinery on the way and will shortly begin operations. The top work on the Shale is nearly completed and a 60 horse power hoist is being installed. The old shaft, 250 feet deep, will be used for further developments. The company expects to have to sink about 700 feet further to pick up the Jumbo Extension formation. Meanwhile no work on the Spearhead, an estate of two claims, is being done on company account.

#### OPERATIONS BEGIN IN WANDERING BOY

Shifts were put to work in the 800 level on a south crosscut from the 802 working, which is about 200 feet from the shaft. This crosscut is being run to the ledge. Work also started on the east drift from the 700 winze. This working is in ore. CHANGES HIS MIND ABOUT GOING BACK TO DULUTH TO STAND TRIAL

But when he arrived in Reno in the custody of Chief Evans, he experienced a change of heart and rebelled against being removed from the state. Koch was placed in the city jail at Reno and application was made to Governor Boyle for extradition papers. Two officers came from Duluth to take Koch back. The exact nature of Koch's offense is said to have been obtaining \$1,000 from a Minnesota railroad as damages for injuries received, which, upon investigation, proved to have not been suffered.

(By Associated Press.)  
NEW YORK, Jan. 21.—Taxation of large fortunes upon the death of the owners, to aid the poor, through the establishment of government agencies to find work for the unemployed, and for provision for the comfort of aged workers, was advocated by Daniel Guggenheim, president of the American Smelting and Refining company, in the inquiry by the federal industrial relations committee, as to the causes of industrial unrest. He said that capital is favored in these measures despite the fact that they constituted some of the cardinal ideas of Socialism. He also advocated an "industrial democracy" wherein the worker received a portion of the profit from labor.

#### FLORENCE MINE HAS A NEW ORE BODY

FOUR FEET OF EXCELLENT ROCK IS EXPOSED IN NEW RAISE

Results of a highly pleasing character are attending the exploration of the new vein revealed about two months ago by a short west crosscut from the main north drift on the 250-foot level of the Florence mine. An incline branch raise started from the main raise at a point 25 feet above the south drift on the vein is exposing four feet of ore that yields values ranging from \$40 to \$70 per ton. Assays as high as \$511 per ton have been obtained.

The branch raise has already opened up the ore body for a height of more than 25 feet and the showing is exceedingly promising, according to General Superintendent Harry B. Clapp. In the face of the south drift on the vein, which is at present 115 feet from the point at which ore is being extracted from the branch raise, there is a streak of quartz, varying from a foot to a foot and a half in width, that gives values of from \$20 to \$40 per ton.

"This matter was to have come before the court upon Jan. 25, 1915, but it was submitted on the hearing already had on Jan. 18.  
"I find from the record sent up to this court that the summons allowed the defendant in the case of King vs. Parker in the justice court of Tonopah township four days after service to answer; and that an answer was offered in that court before the time had expired, but refused because the justice had indorsed on the summons that a response should be made at a certain time, which
